

## PLUS PACK AS GROUP - ENVIRONMENTAL POLICY

Plus Packs main strategic goal is to become the preferred partner of customized packaging solutions – helping our customers to “MAKE FOOD STAND OUT”.

To achieve this, we strive to build long term relationships and partnerships with our customers. This includes supporting external expectations for sustainable development, transparency and accountability.

As a company, Plus Pack has a natural interest in contributing to sustainable and environmental friendly packaging solutions/processes – ensuring a good balance between environment, society and economy.

We believe that our environmental management, next to contributing to the strategy success, has a positive impact on:

- *Protecting the environment – preventing of mitigating environmental impacts*
- *Help minimize the potential effect on the organization by an adverse environmental condition*
- *Assisting the organization to comply to the environmental obligations*
- *Enhancing the environmental performance by continuous improvement*
- *Controlling or influencing, that the products and services of Plus Pack, are designed, manufactured, distributed and disposed using the life cycle perspective way of thinking.*
- *Achieving financial and operational benefits that can result from the implementation of sound alternatives – and hereby strengthen Plus Pack’s position in the market/support strategy*
- *Ensure relevant communication of environmental information to stakeholders*

The environmental management system is based on compliance to legislation and risk/opportunity based thinking, helping to prioritize the most critical areas to Plus Pack and our stakeholders.

Furthermore, investments are made in systems, equipment and human resources to constantly maintain and develop an efficient environmental management system.

To ensure that our management system is well-functioning and updated Plus Pack has been certified to following management environmental standard for several years:

### ISO14001
